- Perfect for residential, commercial, parks, swimming pools and backyards
- Pet and child friendly
- Low maintenance
- Built to last, designed to impress
- Anti slip and scratch resistant
- Waterproof
- Made from recycled products
- Environmentally friendly
- **140 x 22mm 5.4m long board size**

Mexy Tech decking has a real timber feel and a natural texture effect. Burr free surface better than traditional composites.

Engineered with core holes through the deck to provide exceptional stability of the boards. This prevents warping, twisting and cupping, also saving on weight.

Our composite products include UV blockers like no other on the market, which stabilises the colour as the product ages. Giving you peace of mind that our composite will stand the test of time!

Co - Extrusion Suprotect Cladding

- Easy installation
- Low maintenance
- Easy to clean
- No Painting / No Oiling / No Sanding
- Co extrusion layer on the top making it waterproof and stain resistant
- Colour gradient natural texture timber grain finish
- **222 x 25mm 2.9m long stock boards**

Engineered to perform, Mexy Tech provides a buffer bevel edge design, unlike the regular straight model to prevent panels from warping and breakage caused by thermal expansion.

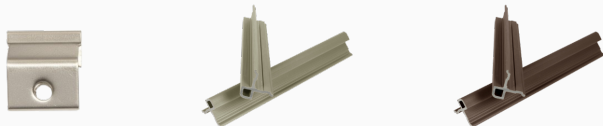

Tried and tested to withstand the intense Australian sun. The system provides a low maintenance easy to clean cladding, giving you zero stress once fitted. Making it a exceptional alternative for longevity.

Installation Options

All colour match trims available

Our cladding and decking systems are easy to install. The cladding only requires a single row of hidden clips to start the process; your future fixings are then hidden by the profile as it is an invisible fixing system.

Easy to use joist system

The clips used for the decking process are designed to act as a buffer to withstand any expansion and contraction using a unique patented system.

Mexy Tech is the benchmark for a lavish outdoor lifestyle

Features	Mexy Tech Composite Decking and Wall Cladding	Traditional Timber Decking and Wall Cladding
Real Timber Texture Finish	✓	✓
Low Maintenance (No Oiling / Sanding / Painting)	✓	✗
Termite / Bug resistant	✓	✗
Long lasting + Durable	✓	✗
Light Weight	✓	✗
Waterproof	✓	✗
Environmentally Friendly	✓	✗
Installation Engineered Guarantees	✓	✗

Mexy Tech uses surlyn for the outer layer with HDPE for the core, creating a supreme composite material. This is due to the way our products are engineered, with a higher percentage of the resin blend giving our composite a superior finish and longevity.

Surlyn is a high-performance ionomer thermoplastic resin. A hard and durable material used for prosthetics and tools in the medical industry; it is also used in the manufacture of golf balls.

Our products include UV-resistant blockers which enables our composite to last longer than others on the market.

Mexy Tech has been endorsed on global projects, ranging from luxury resorts in the Maldives and Qatar, to the Ocean Park in Hong Kong and the Singapore Zoo.

Low Maintenance

100% Recyclable

Water Resistance
